TOWN COUNCIL

TOWN COUNCIL HAS SHORT SESSION

The shortest meeting of the Town Council for some time was held on Tuesday evening, when adjournment was moved just at 9 o'clock. In the meantime, a variety of subjects had been discussed.

It was announced that a uniform for the Town Policemen had been ordered, and would arrive shortly. Permission to build a small porch on a local house was given, and a pile of old sidewalk pavers was sold.

It was arranged that Mr. Stanley of the Department of Health in Edmonton be placed on Wednesday morning to ascertain what is holding up the issuing of a certificate number on the sewage system. As soon as the certificate number for issuing arrangements will be made to hold a vote.

It was agreed that the desire of the council club to sit in the building in the middle of their holding would be quite satisfactory. This arrangement will permit of driving and parking cars all around the building. The long grass hanging over many of the sidewalks will be cut, since it is becoming such a nuisance on wet days.

It was suggested that arrangements be made for the compilation of a voter's list in the near future, since a list of ratepayers is requisite for the money by-laws in any case, and a list of electors may also be necessary at some time.

Announce Open Seasons

WILSON'S SNIPES, DUCKS, GEESE (other than Ross's Geese), RAILS, COOTS

Throughout the Province of Alberta from one-half hour before sunrise September 20 to one-half hour after sunset November 11.

There is a close season throughout the year on Elder Ducks, Wood Ducks, Swans, Ross's Geese, Coots, all shore birds except Wilson's Snipe, and all migratory non-game and insectivorous birds.

BAG LIMITS
In any day: Ducks, 7; Geese, 5; Coots and Rails, 10; Wilson's Snipe, 5. In any open season: Ducks, 5; Geese, 2; Rails and Coots, 3; Wilson's Snipe, 5.

No one shall have in his possession at any time more than 14 Ducks or 15 Geese, or 20 Wilson's Snipe, or 40 Coots and Rails.

HAVE YOU A SOUTH AMERICAN BEAVER?

Zoo-keeper, Tom Baines of Calgary, has heard a report of a South American Beaver or two being harboured on a farm in the vicinity of Strathmore, and is using to track it down. The farm, not the beaver.

His collection, it seems, is not altogether complete, and he'd like to help cement the pan-American union if possible. So if any farmer in the neighbourhood thinks he's harbouring this South American type of rodent, Mr. Baines would be delighted to hear of it and talk turkey. Uh, beaver, that is.

OUR FAMILY GROWS

The British Commonwealth of Nations welcomes two new members, the Dominions of India and Pakistan. After almost two centuries, British rule came to an end on August 15. Henceforth the succeeding twin Dominions run their own show, and having a later vote to the contrary, with in the loose federation of the British Commonwealth.

Canadians will watch this evolution with interest and sympathy, states The Financial Post editorially.

"We have a stake in India's prosperity. Normally that country was third best customer for Canadian goods, being anxious to buy our motor cars, railway rolling stock, newspaper and other manufactured goods. In re-

Miss Voskens Passes

Requiem high mass was celebrated in Sacred Heart Church, Strathmore, Tuesday at 10 a.m. for Johanna Maria Voskens, 76, who died Saturday at her home in Strathmore. Interment followed in the family plot, Strathmore cemetery. Prayers were held in the church Monday at 8:30 p.m.

Born in Tilburg, Holland, Miss Voskens came to Strathmore in 1909. She was a member of Sacred Heart Church in Strathmore and of the Ladies' Altar Society of that church.

Surviving are one sister, Maria, Tilburg; one brother, Peter, Tilburg; three nephews, William, Weyers, Strathmore; Albert Klavert, Calgary; and Joseph Van der Schoot, Calgary; one niece, Mrs. F. Wilson, Strathmore.

Funeral services for Miss Voskens were held at 2 p.m. at St. Mary's, Strathmore, by Rev. J. D. van Nieuwen, A. W. Damen, Peter Vergouwen, C. Cox, A. Van Hooy, and J. Barnett.

Program and Holloway were in charge of arrangements.

RITSON-BENNETT AT WATER SPORTS

Mr. Ritson-Bennett, director of the Water Program of the Red Cross Society, is expected to be in Strathmore Sunday, August 24th, for the Aquatic Sports meet. Part of the afternoon will be given to Mr. Ritson-Bennett.

Program and Holloway consists of two short movies depicting activity in the water, which may be shown, and a display of life saving.

A varied list of events has been arranged for the afternoon by Mr. Smallwood, supervisor, and entrants can be informed of events from him. The interesting and stimulating program will start at 2:00 p.m.

HUSSAR NOTES

By Mrs. M. C. B.

The Hussar Ladies Aid met at the home of Mrs. W. A. Treacy on Thursday afternoon, with about twenty five members and visitors. After the regular routine, a vote of thanks was given to all who assisted in the Hussar Bazaar. Mesdames E. Seely, C. P. English, R. B. Snyder, H. Saunders, T. Burdett, R. Hulen, M. Jensen, R. Warburton, B. Moulton, and Mrs. E. J. Bell, Secretary. The members were pleased to notice that several of those who received letters, have already followed the advice of the Clinic, and have consulted their physicians. The thanks of the Tuberculosis Division was extended to them all, also.

Thanks was extended to all those who served at the dance; Mrs. H. Saunders, Convener of the committee, and Mesdames H. Buckenicht, E. Seely, C. Shobadian, R. Hoeght, and W. Will. About \$29.00 was cleared, thanks to all who contributed the lunch.

Regrets were expressed that none of the members was able to attend the U.P.W.A. meeting to which they were graciously invited. It was noted that the District nurse is taking her holidays, so there will not be a clinic this month. Mrs. E. Seely, Mrs. C. English, and J. C. Hoeght were reported on the sick list, and the song "The Old Rugged Cross" was sung in token of sympathy for them, and for Mrs. Larsen, whose son, Richard, was ill at the time in the Bassano Hospital. (We are pleased to note that he is better and at home again), and Mrs. Blake, whose daughter, Joanne, had just had her tonsils removed.

Plans were set for the Aid Bazaar, October 7, at which time will be a tea continued on page eight—

turn but on a much lesser scale (about one to five), we bought luge, tea, rugs and similar goods not obtainable here. With peace and prosperity in India, that trade would undoubtedly grow, and because it is complementary and in no way competitive, we could expect it to be permanent."

FARMER'S COLUMN—

By R. J. Milligan

Yes, I know you farmers are busy but so is Mother Nature. She is growing perennial weeds like Canada Thistle, Perennial Sow Thistle and Hoary Cress. Now until freeze-up is the best time to control the perennial weeds, therefore if a wet day occurs during harvest, how about plowing up those patches of weeds in your field? It is also an ideal time to spray or dust weeds along fence lines and ditches.

There are several methods of control that can be practiced by you as a farmer. First, an early maturing barley like Old barley or Greenfeed. Secondly, Fall Rye, Thirdly, cultivation. Fourth, Forage crops and lastly chemicals. Most intelligent agronomists use a combination of all the above suggestions.

Changes have occurred in the last number of years in the cultivation practices. It was thought at one time that a completely black summer-fallow was necessary but now the idea of allowing the perennial to reach a height of 1 1/2 to 2 inches before being cut off by farm implements is best. In this way you expend the plant food previously stored in the underground root stocks. However, there is one fault with the above method of control and that is that during harvest, action is so busy that weed control ones by the board, and by failing to cultivate during the fall the control practiced during the summer has been lost. Don't fail to fully plow or cultivate your patches of perennial weeds. Keep at it until freeze-up and leave the land rough and exposed to the fall. Fall rye, forage or Old Barley to control perennial weeds, will be discussed at a later date.

If you use Sodium Chloride, be careful of the fire hazard when poisoning weeds. If you are using a spray, wash all clothing and keep a supply of water on hand as a precautionary measure. Sodium Chloride used as a powder or dust is very effective when used at a rate of one to two pounds per 100 square feet. Be sure to dust powder outside

BOW VALLEY

Minutes of the meeting of the Council of the Municipal District of Bow Valley No. 40, held at the Municipal Office, Strathmore, Al. C. Thursday, August 7, 1947, commencing at 10 a.m., laylight saving time.

Present: Reeve James H. Wood, Deputy Reeve John A. MacArthur, al. Councilors J. M. Wheatley, James Jackson and W. D. Hartill.

PROPOSED BRIDGE W. 28-23-22-4th. Councillor J. M. Wheatley reported that he met the Western Irrigation District Committee, Messrs. Sauter, Chmarnet and Christensen, and they inspected the proposed bridge site between S. 28 & 23-23-22-4th. There was no necessity to open the road but it was necessary to give Vern Green of Standard a means of crossing the creek to enable him to reach his farm lands. The piles were on the ground. The Western Irrigation District Committee agreed to recommend that the District would assume the payment of one half of the cost of driving the piles. The Municipal District would meet one half of the cost of driving the piles. Mr. Green would under take to allow his neighbors to use the trail on his farm so that they would not have access and could use this bridge. Mr. Wheatley then recommended to this Council to accept his report and arrangements.

Hartill moved that the arrangements made to meet the crossing problem on the creek between S. 28 & 23-23-22-4th, recommended by Councillor Wheatley be accepted and approved. Carried.

By-LAW No. 28

To compel the removal of dirt, stones

the patch to catch all small running suckers or plants. It also sterilizes the soil so that nothing will grow for a year or two but can't that better than doing along the road and along at perennial weeds in all fence corners?

Oddly enough I expect everyone who reads this article to be something of an out their perennial weeds.

The Largest Floating Dock in the World

A dock built by the British in Bombay intended for the use of the Royal Navy in Malta, was recently towed there by Admiralty tugs. It is so large (it can accommodate a 50,000 ton ship) that it had to be cut for passage through the Suez Canal.

This picture shows:— The first half of the dock being warped through the El Firdan Swing bridge while a R.C.F. splinter aircraft flies over the top. The second half of the dock can be seen approaching up the Canal in the distance.

rain, dust or rubbish from the roads, and to secure the place within the Municipal District by the Party despoiling the same or responsible therefor, and the placing of same where ordered by the Council. This was read three times and passed.

By-LAW No. 29

To authorize the purchase of a new 141 Richardson Elmover by the Grade, complete with Backhoe, Price \$6,297.40 Terms; Municipal District, valued \$5,797.40 for Caterpillar 12, Blade grade traded in, and \$3,500 cash payment, was read three times and passed.

Hartill moved that the used Road Plow on my premises be sold to the Blackfoot Indian Agency, Glenora, for \$15.00. Carried.

Jackson moved that the small Adams Road Maintainer be sold to Nels E. Stagness of Carleton Place for \$15.00.

Wheatley moved that Councillors Harwood and MacArthur be a Committee to secure and employ a cook

Continued on Page Four

VARIETY OF USES FOR CORN

The contribution which farmers make to many industries may not be generally appreciated, and it is interesting to trace the many uses to which agricultural products are put. The farmer who grows corn, as often as not thinks of it asilage for stock feed. He knows that it can be processed into starch for laundry purposes, into the corn meal and syrup widely used as food products; into corn oil as a dressing for salads, for mayonnaise, as edible, table oil, and into gluten as an ingredient of cattle feed.

Actually these are only the more obvious of the uses to which corn and the products derived from it can be applied. In the food industry it is a valuable ingredient of baking, cocoa, cake, custard and ice cream powders; candies, sauces and various culinary and confectionery products. It is used in the biscuit, pastry baking and confectionery industry; in the manufacture of yeast, and in the tanning and preserving industries. As a raw material it figures in the manufacture of all types of sweetener products such as syrup, glucose and dextrose.

Corn, too, is an ingredient of glues and adhesives. The rubber industry uses corn starch as an ingredient of compositions for coating the surface of rubber articles to produce a smooth, matt finish, and for dusting to permit working with sheet rubber. The size used for fine paper, kraft and paper board and the varying sizes used in the textile industry are derived from corn starch.

Corn is used by the electrical industry in the manufacture of electrolytes used for re-charging dry cells, by the pharmaceutical trade as a binder in medicine tablets, and by the retail druggist in compounding and dispensing medicines. As an ingredient of cleaning solutions, and a vehicle for holding tanning extract, the leather and tanning industry finds it particularly useful.

Corn starch is an ingredient of some explosives and the material is, in others, is used in foundry work, and as an ore dressing to quicken the settling of ore. Even the everyday match owes some of its strength, for corn starch is frequently used as a binder in the composition of the head of the match. It is used in rayon manufacture, in the paper trade as an agent to hold moisture, and soap stock, a fatty acid from corn oil, is used in the soap industry.

Apart from the everyday household use of corn meal, starch and syrup, at least 15 processing and manufacturing industries use corn or products derived from its manufacture, in lesser or greater degree, which indicates the inter-dependence of agriculture and industry.

A Want Ad in the Standard will dispose of that article for which you have no further use.

Strathmore Aquatic Sports, Wed., Aug. 27- 2:00 P.M.

- Foreign Letter -

Dear Sir:

Yesterday, the first American delegates left for Rio; tomorrow Secretary Marshall will others follow, to assist in the negotiation of a treaty for interhemispheric defense. Crucial in the debate is this question: What should be necessary to set in motion the common defense mechanism—whether that turns out to be. Must the vote be unanimous or will

a two-thirds majority be binding on all? These suggestions have already been made; others will appear in the following weeks.

ARGENTINA backs the unanimous vote system; under this any one nation could "veto" the decision of all the others. The smaller Latin American Republics, for obvious reasons, favor a two-thirds majority. The U.S. is in something of a quandary. She scarcely wishes to hamstring by agreeing to a veto arrangement virtually identical with the one which, at San Francisco, wrecked the U.N. But equally disagreeable is the possibility that a two-thirds vote by the smaller Latin America nations could bring her into a conflict in which she would be the only powerful American participant.

BETWEEN THESE TWO UNDESIRABLES, a middle course must be found, such as to give the major source of military strength in the hemisphere at least some word in determining when and how it is to be used—while giving to no nation the power (purchasable in the past) to thwart the will of all others.

MONEY. While the U.S. will continue to insist that the conference confine itself to the production of a Hemisphere Defense Treaty, there is doubt in the minds of none that other nations will make equivalent efforts to discuss finance and other problems, on the side anyway. Hitherto, to almost all loan "requests" (mostly informal) Washington has returned a "nothing doing"; it has been indicated, indeed, that nothing would be done until each country had its own exchange controls and fiscal mechanism generally in order. Many nations have done something toward this end (import controls)—and they will want to talk about it in Rio.

BUT THE SURFACE has scarcely been scratched. The meeting takes place in the most expensive city in all the Americas; it may be seriously doubted if Brazil is yet within sight of halting her inflation—as the delegates themselves will see at first hand—and few enough of the larger nations (possibly excepting Argentina) are in much better shape.

JAPAN: This week also sees the departure for Tokyo, of the first small contingent of foreign business men to be admitted since the war. General MacArthur's cautious plan for the revival of Japanese trade gets under way. The first group is engaged on what all are agreed is "a fishing expedition". Real business is expected to result, but the

volume will be small since the financial machinery set up for handling the first deals is limited and largely experimental. Additional business groups, however, will be admitted once the mechanism shows itself able to function smoothly.

SYSTEM:

The first problem of the military authorities has been to devise a means of circumventing the foreign exchange problem. This has been achieved by permitting foreign buyer to deal directly with the Japanese merchant or manufacturer, but requiring that financial settlements be made through the Bank of Japan (the Board of Trade). In theory, at least, the system is simple: the buyer hands over dollars (or other foreign currency) while the seller is paid off in yen. But the question is whether, in actual operation, it may still not involve too much red tape.

MACARTHUR:

In undertaking to facilitate the revival of Japanese industry, the Supreme Commander is under no such limitations as those which circumscribe General Clay in Germany. Whereas detailed orders are transmitted to the latter by the Joint Chiefs of Staff (in which permissible levels of operation, etc., are specified for each industry) MacArthur resolves only "suggestions" or "recommendations". Plainly, the problems in the two occupied countries are by no means altogether comparable, but the differential attitude shown him is one the less a tribute to MacArthur's refusal to be pushed around by long distance control.

INDUSTRIAL RECOVERY IN JAPAN, hence, will be retarded by considerations of militarism and war-making capacity. The problem is to reduce the burden, now carried by the U.S. alone, of feeding the Japanese people; if a "war potential" is created in the process of reviving industry, reeducation of the Japanese people and U.S. watchfulness are counted upon to see that the expanded production capacity is never so used.

ISLANDS:

American Naval policy, which contemplates permanent occupation of Okinawa and the entire Ryukyu island chain, has important economic connotations for Japan. Passes and fortifications will call for heavy expenditure of dollars and assure profitable employment for large numbers of skilled Japanese laborers.

TRADE:

In still another way, this week's events should benefit Japan. The final departure of the British Raj from India, ending nearly 200 years of direct occupation, will result in far more than the political changes involved in setting up two or more Dominions; the trade chains which have hitherto bound India so closely to Britain will also be loosened.

AN INSTANCE of this is to be found in the cotton goods trade. Under India's former agreement with Japan the latter country could sell up to 100 million yards of cotton cloth annually in return for the right to buy one million bales of the raw fibre; Britain, however, reserved to itself the right to sell India a billion yards of cloth annually. An independent India, and its sister Pakistan, can henceforth make their own deals. Since they primarily require low-grade cotton cloth, whereas Britain specializes in the higher qualities, Japan is expected to be a beneficiary.

INDIA:

The division of the Indian sub-continent into Hindu and Moslem Dominions has not solved all the problems. As this LETTER has previously said, it is altogether improbable that the innumerable Principlities will neatly divide toward one or the other. Nor is this an insignificant matter, many of the princely States are small, but by no means all Hyderabad is as large as Italy, its Nizam the world's richest man. At this writing, the Rajastan headache is still with the negotiators.

CANADA TO GO A-BORROWING?

Britain's dollar crisis has raised in Ottawa the burning question of whether or not Canada may have to seek a dollar loan in the United States within the next six months.

A few months ago such a prospect was brushed aside as very remote. Now, reports The Financial Post, it looms as highly possible.

Reason for this view is roughly this: That Canada's own dollar position is not immediately urgent but will become very urgent at or about the turn of the year. In short, we have perhaps another four or five months "grace" here, but must face the sort of emergency which confronts Great Britain today.

Late Summer Best Time To Seed Lawns

The best time of the year for seeding lawns is during the latter half of August if the soil is in good condition and free from weeds at that time. By then there have been ample opportunity for destroying all seedling weed plants. Late summer seeding usually receives ample moisture and cool nights to favour germination and the rapid development of a dense turf. Such a new lawn may become well established before another crop of weeds such as dandelions occur to compete with the growth of new grass.

A good lawn seed mixture is one-half pound Red Top, one-half pound Kentucky Blue Grass and three pounds Creeping Red Fescue seed per 1,000 square feet for a small lawn. For larger areas less seed may be

used to save expense.

Once a lawn has become established it should be given a certain amount of care to maintain it in good condition. Dandelions and other lawn weeds can readily be kept under control with a selective herbicide with little injury to the grass. To improve the vigour, density and fineness of the turf, old well-rotted manure applied each fall at freeze-up will help a great deal. An occasional top dressing from time to time of artificial fertilizer will also be beneficial, but it must be distributed evenly when the grass is dry to avoid burning of the grass. Mixing the fertilizer with screened loam will facilitate even distribution.

RURAL GLEICHEN

Mr. and Mrs. Reg Johnson from Red Deer visited Mr. and Mrs. W. Pettit Sunday. Mrs. Shirley and Melvin Pettit accompanied Mr. and Mrs. Johnson to Red Deer for a weeks vacation.

Born to Mr. and Mrs. Frank Michael on August 8, at Calgary, a baby boy. Mrs. D. Henderson and son of Lethbridge are visiting at the home of her parents, Mr. and Mrs. W. Cook.

Mr. and Mrs. Jerry Mooney of Irricana were guests at the home of Mr. and Mrs. Ed Menard.

Mrs. E. Taylor and son Edgar left Friday for a visit to the western United States.

Mr. N. T. Farrell, our assistant postmaster, is taking a weeks vacation in the area around Nelson, B.C.

Mr. Bert James of Blair Diamond, and Mr. Douglas James of Calgary attended the funeral of their father, W. H. James Monday.

Mr. and Mrs. Geo. Walker are delighted over the arrival of a 7½ pound baby boy, born August 13 in the Holy Cross Hospital, Calgary. Grandpa Walker is wearing a smile that won't wipe off.

Mrs. J. J. Robinson is home from hospital and feeling fairly well after an operation.

Mr. and Mrs. L. Ironsides of Calgary were guests of her Mother, Mrs. Hoey.

Mrs. B. Briggs of Beynon attended the funeral of her brother, W. H. James last Monday.

Mr. and Mrs. R. Romans and sons of Winnipeg visited Mr. and Mrs. W. Sutermeister and daughters for a few days. Then they went to Calgary, Banff and other points of interest taking Mrs. Jennings and Vern with them. On their return the Romans, Jennings, and Sutermeister met for a reunion. Mrs. Jennings, Mrs. Roman and Mrs. Sutermeister are sisters.

Mrs. G. Hall entertained at an afternoon tea on Thursday for a number of friends.

Mrs. W. F. Erford and Mrs. Sam Duncan were Calgary visitors on Thursday.

Mr. and Mrs. W. Sutermeister and daughters Joy and Pauline have returned home after a two weeks holiday. They visited many points of interest, such as Banff, Jasper, Olds, Edmonton, and Mundare.

Mrs. Bernice McKeever, Loretta and Billie returned home Thursday after holidaying at Turner Valley and Calgary.

The friends and neighbors wish to express our warm sympathy to the relatives of the late Mr. W. H. James. Mr. and Mrs. J. H. Sammons, Miss Selma Sammons, Mrs. P. Warner and Neil motored to Calgary Friday.

We notice Mr. Elmer Bollinger and Mr. M. Bollinger Jr. are driving new trucks. Nothing like being prepared for a real harvest.

Mrs. Earl Edridge went to Calgary on Thursday and returned home later with a beautiful baby boy.

Mr. and Mrs. J. W. White and sons, Bobbie and Ronnie motored to Calgary on Sunday.

Mr. and Mrs. Mason Jones and twin sons from Kansas City are visiting with his parents, Mr. and Mrs. G. T. Jones.

Mrs. B. Holt and baby boy came home the middle of the week from the Bassano hospital.

Mr. and Mrs. Harry Hamar have disposed of their property and are moving to the coast.

A large crowd watched the Old Timers play a game of baseball on the ball diamond at Gleichen Sunday.

Mr. and Mrs. F. Wilson motored to Calgary Sunday.

There will be no service in St. Andrew's Church on August 24. As our incumbent, Mrs. Ford and baby are on vacation.

Mr. and Mrs. J. Henry Sammons will be celebrating their Golden Wedding Anniversary on Sunday, September 7, at Meadowbrook Community Hall, Gleichen. Supper is to be served to invited guests at 7 P.M., Daylight Saving Time, and any wishing to offer felicitations will be welcome from 9 P.M. on.

NEW LAND OF PLENTY

Canada's next big boom is already under way, although it will not strike its full stride until next spring. A 100,000 square mile area of north-eastern British Columbia, recently opened up by the Alberta Highway, is rich in mineral, lumber, power and agricultural resources, according to a special survey in The Financial Post. Big development in this area is expected as roads and a connecting railroad are provided.

CLUNY NOTES

By Mrs. B. R.

Mr. and Mrs. Pete Ries are the proud parents of a lovely baby boy born August 11, in a Calgary Hospital.

Miss Alice Nowicki came home from Edmonton.

Mr. and Mrs. B. Reimche and family were dinner guests of Mr. and Mrs. Helmer Wellen on Sunday at Clearcreek.

Mr. and Mrs. Bill Sniderman spent last Thursday in Calgary.

Mrs. E. Watson and daughter went to Hussar last week to be with her husband, where he is working at the present.

Mr. Andy Nowicki spent a few days in Cluny.

Mrs. L. Goldsmith spent a few days out on the farm at Mr. and Mrs. Bob Goldsmith.

Mrs. G. Goldsmith and Dorothy are at Lac du Bonnet for a few days about equal to the hospital. We all wish her a speedy recovery.

Lynn Beattie is visiting her grand parents, Mr. and Mrs. Beattie.

Mr. and Mrs. Ken Tolsonson and family from Calgary, are visiting at the home of Mr. and Mrs. Spillett.

Mr. and Mrs. Edwards have returned from their trip, reporting having had a swell time.

An old timer of this district, Mr. A. Arkell, celebrated his 70th birthday on August 16.

Mr. and Mrs. B. Thompson and family were visitors at the home of Mr. and Mrs. F. Thompson on Sunday. Sonny Simonson celebrated his birthday Monday, when he had a few of his friends in.

Land For Veterans

Near Wanhman in the Peace River block (a short distance east of Spirit River) work is going ahead in preparing land whereon to settle one hundred war veterans next spring. This is an Alberta government scheme for settling returned men, and Hon. N. E. Tanner, minister of lands, is in charge of it.

Each veteran will get 320 acres of land, on which 275 acres have been broken and prepared for seeding. In addition each veteran obtains a grant of \$2,320 under the Veteran's Land Act for equipment and stock.

During the first seven years of occupancy the veteran is required to pay to the Alberta government one-third share of crops grown on the land. This is to pay for the cost of clearing, breaking and cultivating the land. At the end of ten years the veteran will have clear title to the half section.

The area now being broken in the Wanhman district is in the grey soils region, which is more suitable to the growing of grasses and clover and mixed farming than for grain production.

—THE BUDGET

International Banking

Those who believe that the recovery of the world depends upon industry and trade rather than upon any so-called "ideology" are watching closely the operation of the two international banking instruments designed to promote reconstruction and trade. These are the "International Monetary Fund" and the "International Bank". Both were devised at the famous "Bretton Woods" conference of 1945 and both are now in operation.

The first fund is designed to keep some balance between the currencies of different countries so the trade will not be hampered by unfair "devaluation" of currency. Such action by one country always leads to retaliation by another and the end is chaos and trade stagnation which can only mean a lowering of the standard of living for the people of both countries.

In May of this year Canada's sales to Great Britain were more than 75

million dollars greater than her purchases. While this continues to be spoken of as a "favourable" balance of trade, it can only result in trouble for both countries unless the remedy of international action is effective.

While the socialists of the World belittle the importance of world trade and talk endlessly of their "ideologies" and "national planning" it becomes increasingly obvious that production and trade are the two great needs of peace and happiness in the world.

MOVING BY AIR

An Englishman wanted to move his furniture from France to Britain and the removal firms which he approached said that they could do the move in three months. So he hired a Miles Aerovan and the entire removal was completed by air in 36 hours. An additional advantage was that the insurance premium was only one-third of the sum normally charged for the land and sea route. The furniture, in this case, weighed a little less than a ton.

Save Forests or Else

Commenting on the Kennedy Report on Ontario forest resources, the Financial Post suggests that there may be disagreement with some of the main recommendations in the report, but that there can be none with General Kennedy's blunt warning that if something is not done and done quickly, what is now a flourishing lumber industry, will be a minor one in 25 years.

The same observation could well apply far from Ontario. The general situation obtains just as much in the West as it does in Ontario.

In the last 35 years there have been other major forest investigations. There has been continuous talk about conservation. There has been a little planning and some replanting. But the net results has not been too impressive.

Certainly we can't go on squandering our forest resources and expect to have timber, pulp and employment in

the future. There must be continuity in operations and long-range planning. Too often, with no guarantee of any kind, land conservation is the incentive has been for a company to go in, slash down everything saleable and move on. As a result the life of the main forest industries has been threatened, and there has been serious injury to agriculture through the loss of a re-usable watershed, as well as to property along flood rivers and to our tourist trade possibilities.

It is interesting to mention at this point the work expected to go on in connection with the irrigation developments in the south of the province, through which it is planned to carry on an extensive reforestation program. The object of this, of course, is merely to protect and build back the watershed, but it may well have far-reaching possibilities in addition to this.

The Rule of Taboo

This complex civilization and healthy culture occasionally must stagger under man's admission that the howling savage at times solved his problems with greater ease. Savages were ruled by the taboo and the law of the taboo was not to be violated.

Modern human beings are creatures in a culture that never has learned how to impress its members with "musts" and "must nots."

Children refer to teachers as "sour pussers," "old goats" and "beeks," without a word of adoration from their parents. Too many are sent to school with orders to go because they have to, and without explanation that school is maintained for the child's benefit.

Children are permitted to be cop-haters, with parents neglecting to explain that police have a place in the scheme of modern life. Few parents bother to explain destruction of public property comes out of the family purse—through taxes.

Coming again from the savage, it must be remembered that one thing he hated was cowardice. Not one of the young vandals who frequently run afoul of the law by destroying public or private property probably has ever been told that such an act is the act of a coward. They think it is an act of boldness because they have never seen it differently.

—Calgary Albertan

Cops Crab Crime Comics

A recent convention report from Indianapolis states that the Fraternal Order of Police has condemned as "unrestrained, bold, vicious, salacious, and immoral" comic books, radio programs and motion pictures which glorify criminals.

By resolution, some seven hundred delegates to the convention, offered to sponsor a movement among "religious, and educational groups to abolish the publication of all such literature, movies, and radio programs detrimental to the youth of this nation."

Thank heaven for this voice of pro-

test! It is doubtful how much effect it will have, but maybe they can start in ball rolling. We are sure that artists who recall Moby Dick with a shiver would be horrified could they see themselves to read one of these modern "comics" on which their children squander their money and their time.

On the other hand, probably numbers of parents are afraid that were comic books banned, they would themselves be unable to find their own copy of "Thrill," "Real Life Detective," "Crock Busters" and "Exposé."

NIGHTINGALE

By Mrs. F. H.

Miss Helen Thurston and Miss Gwen Tew are enjoying a holiday in Calgary. They are guests of Mrs. Hare.

Mr. and Mrs. Roy Voutier are receiving congratulations on the birth of a son. All members of the family are doing well.

Mrs. Banerman of Calgary was a visitor last week with her Mother and brother, Mr. Don Douglas.

Mary Martha Downey of Calgary and Beverly Hildahl of Morris are visiting with their grandparents, Mr. and Mrs. F. H. Harriman.

The girls of the community gathered at the home of Mrs. Geo. Thurston last Friday. They are keenly interested in organizing a girls club in the W. I. and are holding an organization meeting at the home of Mrs. Meston on Friday, August 29. We wish them every success.

Mr. and Mrs. Pete McLean, Mrs. Christofferson and sons, also Mr. and Mrs. Gosling and children of Daledand held a family picnic at the river last Sunday.

Mrs. F. Harriman returned to her home last Sunday after a ten day visit with Mr. and Mrs. P. H. Hildahl of Morris. Friends of Penard will be glad to know he is recovering rapidly from a serious illness.

Cluny won the ball game from Nightingale by a score of 6-7. This leaves Carseland and Cluny for the final play off.

MRS. E. HOLT SAILING FOR ENGLAND

On the afternoon of AUGUST 8, the ladies of the W.I. spent a pleasant time at the spacious home of Mrs. Chas. Kimmitt. The occasion being a party in honor of Mrs. Edna Holt, who is expecting to leave for England in the near future. For entertainment an impromptu program was arranged with each lady contributing. There was also community singing and a special reading contest. Mrs. Eva Weston won first place and Mrs. Edna Holt was second in translating the tongue twister. A very delicious lunch was served and President, Mrs. Don Douglas, on

NO FARM STRIKE

According to a news despatch from Edmonton Carl J. Stimpfle, president of the Alberta Farmers' Union, said that there would be no farm strike in Alberta this fall.

George Bickerton, president of the United Farmers of Canada, Saskatchewan Section, stated on Monday at Saskatoon that the organization had decided against strike this year.

Pressure will be continued in support of an initial Wheat Board price on the basis of \$1.60 a bushel for 1 northern wheat at the terminal, this to be retroactive to the 1946-47 crop year.

New Check on Polio

Designed to provide a better understanding of how the childhood disease of poliomyelitis is spread, a new research project financed by Canada's life insurance companies, is now under way, according to an announcement by J. K. Macdonald, chairman of the health committee of the Canadian Life Insurance Officers Association.

Study will be made of the early childhood evidence of poliomyelitis and of the signs of abortive poliomyelitis as well as an investigation into the hygienic conditions of homes of patients treated during the course of this study. Abortive poliomyelitis is the condition where the symptoms of the disease occur but where there is no paralysis.

On behalf of the W.I. presented Mrs. Holt with a sterling silver spoon with the W.I. crest and engraved with Nightingale, Alberta, also a linen handkerchief with names of the members embroidered on it. She told of the wonderful co-operation Mrs. Holt had always given the W.I. and how she was always ready to give a toast or do any work necessary. She will be greatly missed but all wish her a safe journey and a pleasant arrival at her old home. Mrs. Holt expressed her deep appreciation for the gifts and said she would always remember her pleasures in doing and being a part of the Women's Institute.

Dedication of Cairns In Waterton-Glacier International Peace Park

Two cairns, which have been erected near the International Boundary between Waterton Lakes National Park in Alberta and Glacier National Park in Montana, were unveiled at a dedication ceremony at Waterton Park townsite on Saturday August 2 according to a statement issued by the Hon. J. A. Glen, Minister of Mines and Resources, Ottawa. The cairns, one on the Canadian side and the other on the United States side of the boundary, are on the Chief Mountain Highway linking the two parks.

The erection of these cairns is the result of thoughtful suggestions and efficient efforts by Rotary International. It was Rotary International that originally sponsored the action which resulted in legislation being passed in 1932 by the Parliament of Canada and the United States Congress establishing the Waterton-Glacier International Peace Park. The erection of these cairns is a further step in commemorating the understanding and goodwill which have so long prevailed between the peoples and the governments of the two great democracies. For more than 120 years unbroken peace, has existed along the

unfortified boundary line of over 5,000 miles between Canada and the United States, furnishing to the world an unequalled example of international amity.

Besides uniting two parks, the establishment of the Waterton-Glacier International Peace Park links the national park systems of Canada and the United States — areas which are playing an increasingly important part in the lives of the peoples of this continent. The United States national park system is, of course, the older having had its inception around a camp fire in the wilds of Wyoming back in 1870. The idea was first translated into action two years later with the establishment of Yellowstone National Park. Canada followed the example of her neighbor to the south in 1895 when first national park was established around the hot mineral springs at Banff, Alberta. Since then the national park system of Canada has grown to 25 separate units comprising a total area of 29,660 square miles. This chain of national playgrounds and places of historic interest extends from the Atlantic coast in the east, to Selkirk mountains in the west, and is represented in every province.

Not only are the national parks important from the point of view of health and recreation for Canadians, but they are also major tourist magnets. Last year they were hosts to nearly a million visitors, and there are indications that this figure will be exceeded during the present year.

Those taking part in the dedication ceremony on August 2, were Senator W. A. Buchanan, representing the Government of Canada; Ernest T. Eaton, Governor of Montana; Hon. J. C. Bowen, Lieut. Governor of Alberta; Venerable Archdeacon S. H. Middleton, Chairman of the Waterton-Glacier International Peace Park Committee; Tom J. Davis, Past President Rotary International; L. C. Merriam, Regional Director of the United States National Park Service; J. W. Emmert, Superintendent of Glacier National Park; and H. A. deVeber, J. A. Hutcheon; J. A. Wood, the Superintendents of Waterton Lakes, Banff and Jasper National Parks in Alberta.

No Price Decline Seen Now

What will happen to prices in Canada? Here's an estimate prepared by The Financial Post:

Remaining firm — furniture, men's clothing, some women's wear, fur. Possibly rising — canned grocery items, coffee, soap, cotton products, flour, durable goods.

Possibly dropping — small radios, nylon stockings.

Retailers who were talking price declines last spring aren't talking that way any more. It looked then as if most prices had reached their peak and some were ready to topple over. Many retailers held off buying, then found that just as many customers still wanted to buy. Today those retailers are again buying. They find prices still as high; in some cases higher, than last spring. Prices said to be at a peak seem firmly perched; increases are still to be expected on other items.

Standard want ads have no holiday. They get results anytime.

CHANCELLOR NOTES

We are sorry to learn that Mrs. S. W. Busch is quite ill in the Holy Cross Hospital also that Mr. M. Hnatjuk has undergone an operation in the same hospital, we wish them both a speedy recovery.

Miss Francis St. Dennis spent the weekend at her home in Piapot Sask. Mr. and Mrs. Wm. Anderson of Westlock have been visiting the C. V. Madsen's.

Mr. and Mrs. Douglas Magoon of Massonville, Quebec, were visitors of Mr. and Mrs. Hocht sprout. This honeymoon couple have already travelled 2,907 miles and are continuing on to Banff and points in B.C.

Mr. J.M. Wheatley was in Edmonton for 3 days this week.

Mr. and Mrs. Huddleston and Mr. B. Price of Italia, surprised Mr. L. V. Mann, when they visited this week, the men folks had not seen each other for 33 years.

Rev. Father Augustine and Mr. G. Reece of Atheson, Kansas, visited Mr. and Mrs. G. G. Phillips on Sunday evening. The Rev. Father is a Radio Ham.

Mr. and Mrs. B. L. Hiegi moved into their new home on Sunday.

Mr. and Mrs. L. C. Smith, Mr. and Mrs. Leishman, Mr. and Mrs. C. B. Christensen, and Helen and Rosie Hnatjuk, picked up Carsland on Sunday. They came home with 6 fish.

STOBART

Mrs. St. Jean, George St. Jean, his wife and son, Leo, and Helen Plante were visitors at Mr. and Mrs. George Desjardines and Gleichen district over the weekend. These folks are well remembered by many of the district as they used to reside in Gleichen some years ago, moving from there to the Peace River region.

Mr. and Mrs. Floyd Page, Joyce and wee Harvey, and Mr. and Mrs. Jas. McBean were visitors at Mr. and Mrs. George McBeans Thursday.

Mrs. Page will be remembered as Irene McBean.

Capt. John Cook of Vancouver visited his parents Mr. and Mrs. Wm. Cook Sunday.

Mrs. Thomas Henderson and two sons of Lethbridge visited the former's parents, Mr. and Mrs. Cook for a few days.

Miss Adelle Erdman was a guest at Mr. and Mrs. Ed Ferguson's over the weekend.

Mr. and Mrs. Ross Fiddes of Gleichen visited at the Ed Ferguson home Sunday.

Miss Jean McBean of Calgary spent Sunday at the home of her parents, Mr. and Mrs. George McBean.

NAMAKA NOTES

By Mrs. E. B.

Miss Dawn Cote of Carsland is spending a few days with Mr. and Mrs. Francis Aikens and family.

Miss Marguerite Mackie is helping out at the H. Schumann home for several days.

Mr. and Mrs. Page and family of Stettler visited with Mrs. Page's brother, Mr. Jim McBean, and Mrs. McBean and other relatives in the district last week.

Mrs. Wm Fawkes and Jean spent last weekend in Calgary.

Mr. and Mrs. Chester Edwards of Latham, and Mr. and Mrs. Gordon Bogette of Gleichen, and Mrs. M. Watts spent Sunday at the Ike Fawkes home.

Mrs. L. R. Aikens spent a few days this week with Mr. and Mrs. Wm. Poll of Baintree.

Mr. Edgar Peterson and family of wats spent last week visiting with his mother, Mrs. M. Peterson and family.

Mr. and Mrs. Bennett of Calgary spent a couple of days with Mr. and Mrs. Jake Lepp and family this week.

Miss Margaret Thomson and Mrs. Reg Pollard have returned from a trip by bus to B.C. and are visiting with Mr. and Mrs. H. E. Thomson.

MANUFACTURED BY THE DESIGNERS OF FLEET AIRCRAFT

EVERYBODY'S BUSINESS

The path to success is strewn with many pitfalls.

One which catches many victims is the tendency to regard oneself as being just another worker among a mass of other workers.

Such an attitude stifles achievement. Every man should regard himself as an individual with a unique combination of talents and skills. Realizing this he will try to make his own special contribution. Then, and only then, will he begin to advance.

By the same token, it is important to take a positive attitude toward each day's work. To one man, it is just a matter of so many hours of labor which must be done in order to provide the necessities of life. To another, each day is an opportunity to prove his skill and value — and to take another step toward his goal.

It won't be long before the second man's attitude pays off in increased income.

Every increase in income brings with it an opportunity to provide greater financial security through Life Insurance. The wide variety of plans and policies makes it possible to choose one that meets your individual financial requirements.

Leafy Spurge, One of the Five Bad Weeds

Leafy Spurge, one of the most serious noxious weeds, has been reported in the central and southern parts of this province for some time. Reports from Field Supervisors indicate that this weed is also found in the northern part of the province, states W. Lobay, Supervisor of Agricultural Service Boards. All farmers are urged to be on the lookout for this plant and if found to report it to the local Field Supervisor or District Agriculturist immediately.

Leafy Spurge usually appears in clumps. It is a perennial, reproducing by rhizomes, roots and seed. Numerous stems grow each spring from the crown or the old root and branch out near the top of the plant in a cluster of lowering parts. The plant grows about 2 to 3 feet high. The stems exude a milky sap when broken. It bears a resemblance to flax in the early stages, the leaves being smooth, narrow and without stems. Two distinguishing features of Leafy Spurge which aid in its identification are the bright green colour of the plant and the pale yellow-green flowers.

The perennial weed is extremely difficult to eradicate, states W. Lobay, because of the creeping wide-spreading roots which are quite woody and tough. At least two years of frequent cultivation will be necessary. Because growth commences early in the spring, smother crops are generally not effective in obtaining control. Preliminary work with 2,4-D by the Field Crops Branch appears to give promising results in control of Leafy Spurge. Rates of one to one-and-a-half pounds of 2,4-D acid per acre has affected the plants to the extent of twisting the roots and stems and halting seed production. In five weeks time the stems and the roots, to a depth of about 4 to 5 inches, appeared to be dried up. Follow up applications with 2,4-D

CARSELAND

by E.B.

Mrs. Baird Sr. and Miss Alice Baird of Edmonton are spending a short holiday with Mr. and Mrs. Jim Baird and family of Carseland.

Greta and Ethel Cann of Brooks are spending a few days with Kathleen Anderson.

Bert Woodrow of Red Deer was a Carseland visitor last week. Before returning to Red Deer Bert and Bill Cole motored to Cayley to spend a day with W. Crowe.

Mr. and Mrs. Krueger, Lorraine and Vernon left Wednesday for a two week vacation in the States. They plan on visiting relatives at Yakima, Washington, and spending a few days with the Gehrke family who recently moved from the district to Tacoma, Washington.

Mrs. Thiel and daughter, Hilma, of Vauxhall spent the weekend with Mr. and Mrs. T. Neergaard.

Mrs. C. E. Cole returned from Revelstoke accompanied by her daughter, Mrs. F. Carey, and children of Revelstoke.

Lois Lausen had Ruth Chatelain stopped for a visit at Arnold Lausen's and the Stagness family at Bowden, later going on to Sylvan Lake for a week.

Miss Lois Lausen has returned to Calgary where she has been employed by the Industrial Acceptance Corporation. Good to know you are feeling better Lois.

might be necessary next spring for any new growth which may appear.

URGENT DRIVING CAR AS SCHOOLS REOPEN

Opening of schools in the province on September 2 following the summer vacation means that possibly 180,000 pupils will be attending this term.

Officials of the Alberta Motor Association point out that many of these youngsters will be attending school for the first time. They may not be so much on the alert as older pupils in taking every precaution to avoid accidents. Consequently, motorists are being urged to exercise extreme care when approaching or passing through school zones or areas.

It has been suggested that school and municipal authorities also would be well advised to survey the traffic and stop signs near schools. Some may need repainting or relocating and other steps to make the installations more satisfactory and to reduce the accident hazards.

Formation of school boy etalon

FEED SUBSIDIES STAND

The federal government has announced that because of the disappointing crop prospects subsidy payments on feed will be continued "until the ceilings (prices) on all major animal products are removed."

Subsidy payments are 25¢ a bushel on purchases of all grades of barley and on purchases of wheat having a value equal to or less than 4 northern. The subsidy oats is 10¢ a bushel on all grades.

These subsidies are payable by the government to stock and poultry feeders who purchase wheat, oats or barley for their requirements. While it applies to feeders in all Canadian provinces, it is of greatest interest to those in Ontario, Quebec and British Columbia, who are large purchasers of western feed grains.

In addition to the subsidy, feeders in Eastern Canada have the freight paid by the federal government on shipments from Fort William eastward, and those in British Columbia from Calgary westward.

Farmers in Western Canada who raise and feed their own oats and barley can not obtain such subsidies on the grain they produce on their farms.

You can get anything but a third hand through the Want Ads in the Standard.

FORCED MOULTING OF HENS

Poultry producers who are planning to carry over some of last year's birds for breeders or as layers for another year are advised by C. W. Traves, Poultry Commissioner, to start the hens on a forced moult. Egg prices will be going up 5 cents per dozen on September the first so the sooner the old birds through the moult and into production the better. The period of forced moulting provides a splendid opportunity to clean, disinfect, and "rest" the laying houses before the pullets and forced moulted hens are put in.

Forced moulting is becoming quite a popular practice and is one of the simplest of poultry chores. Provision should be made for open range shelters sufficient for the number of hens to be moulted. These should be thoroughly disinfected and whitewashed and moved on good pasture if possible. The laying flock are then carefully culled and the hens to be forced moulted, placed in the range shelters. For the first four or five days only fresh water and pasture should be supplied. Following this good quality whole oats, grit, and shell should be fed for two or three weeks. At the end of this time an ample supply of laying mash is provided. Production will practically stop during the first week. From then on the birds must have an ample supply of fresh water and feed.

As the hens are completing the moult and showing signs of coming into the lay, they should be culled each week and the more advanced birds put into the laying quarters until all the best of them are in. Those that did not come through the forced moult in perfect condition should be marketed.

EFFECTS OF 2, 4-D ON CEREAL GRAINS

Considerable publicity is being given to and interest shown in 2, 4-D as a weed killer, which many persons mistakenly regard as the perfect weed killer. In spite of all the wonderful things that might be said about 2, 4-D, it cannot be called the perfect weed killer. For certain uses, such as killing dandelions in lawns, if precautions are taken, it is incomparable. For weed control in growing crops of cereal grains, care should be used in its application.

The Dominion Experimental Station at Scott, Sask., has not yet two years of experimental evidence on its use in growing crops of cereal grains. In these experiments, various formulations were used at different strengths. In all cases it was found that the lowest concentrations of all formulations resulted in almost a complete kill of annual weeds in the growing cereal crops.

The spraying took place in early July just before the grain had headed. With the amounts used the only formulations which appeared to affect wheat were the various esters. The main effect consisted of twisted and abnormal appearing heads and maturity being slightly retarded. However, seed from these abnormal appearing wheat when sown germinated normally and failed to produce any off-types. All formulations appeared to cause delayed maturity in barley but no other harmful effects were noticed. Oats appeared to be more severely retarded in maturity and in some cases stunting took place. The effect on flax in all cases was injurious.

HEAT CANKER IN FLAX

From several inquiries received at the Lethbridge Station within the last few weeks it is evident that losses

have occurred this season in a number of flax fields from Heat Canker. Trouble from this source frequently arises in extremely hot, dry weather such as that experienced this season in July. It occurs in late sown fields where the plants have reached a height of about eight to twelve inches, and where the stand is so thin that the surface of the ground is not shaded. Under these conditions the sun's rays heat the ground to such an extent that the plants, at this stage of growth, are unable to withstand it, the result being that they fall over. The stems where they have come in contact with the ground, have a slight cankerous growth and their upright appearance suggests that they have been girdled by some insect.

In order to guard against this trouble in flax every effort should be made to see that the flax crop shades the ground sufficiently during July weather to prevent it from becoming too hot. While it is frequently necessary to delay seeding to control weeds, it should not be delayed so far that the crop is endangered from this cause. The belief that flax ripens in a much shorter season than wheat is still fairly prevalent. Actually flax requires practically the same length of growing season as Marquis wheat.

A disease called "Stem Break" has also appeared this season and can easily be confused with Heat Canker as the stems break off in much the same way in both cases. Older plants, however, may be affected by it and may occur in heavy crops where the ground is well shaded. The disease causing the disease is seed borne, but may become established in the soil upon planting. The chief control measures for this disease are treatment of the seed with one of the mercurial dust treatments and rotation of crops.

WEED AND INSECT CONTROL BY FALL CULTIVATION

Weed control in Southern Alberta is an increasingly difficult problem and, due to conditions, although a great labour saver, must take large share of blame for spreading weed seeds. Cultivation for weed control has been largely confined to the summer fallow season and this was necessary, for in a windy country we must not destroy our stubble by blowing it down unprotected over winter. Not only is danger of soil drifting increased, but the snow may also be blown away and cause this winter moisture.

New developments in farm implements now make it possible to cultivate without destroying the stubble, and a fall stroke to destroy weeds therefore becomes feasible and desirable. Blade type implements and cultivators are of course the only ones that will leave any considerable amount of stubble standing. The one-way, even wheel, used for a very shallow stroke, breaks down practically all stubble and at this time of year it will not kill the fully grown weeds unless worked deep. This method may lose more in winter moisture than is gained in weed control.

Observations at the Lethbridge Experimental Farm and by practical farmers indicate that Russian Thistle can be prevented from seeding if cultivation is done early, and that reasonable after-harvest cultivation will at least reduce the percentage of viable seed. The increased germination of seed such as stinkweed and mustard after fall-cultivation has been very noticeable and surprising because with the cultivator the weed seeds are not turned under, yet it has been observed at the Lethbridge Experimental Farm and by farmers who practice fall cultivation. This makes the fall stroke an important one for cleaning the ground as some weeds are prevented from seeding while seed already in the ground is germinated to be killed with the first stroke.

The value of fall cultivation for insect control depends very much upon the prevalence of dry weather immediately after the ground is worked. Since drying kills both the Saw-fly grub and Grasshopper eggs, it is important that the work be done as shallow as possible to dry out the top soil. Early work in a dry season results in a high percentage of destruction of both pests. The loosening of the top soil also discourages further laying of eggs by grasshoppers which move to firmer ground.

"Old at 40, 50, 60?"
— Man, You're Crazy

Forget your age! Thousands are happy at 40. Try "pepping up" with Oxtrex. Contains tonic for customers feeling due solely to lack of iron which many men and women call "old." The English doctor who says "Oxtrex" is Oxtrex Tonic Tablets for new iron, vitamins and your feeling. Use 100 capsules daily for sale at all drug stores everywhere.

Under The Street Lamp

by PAT O'HOLEY

Norman Jones called Charlie Bonnett into the office.

"Listen, Charlie," said Norman, "I find that last year's business was the best since we opened. I know how hard you must have worked, and as a special mark of my appreciation, I'm making out a cheque for \$500 for you."

Charlie stammered his thanks. "Yes," went on Norman, "and if next year's business is as good, I'll sign it."

Betty Martin (over the phone): "Are you the game warden?" Warden: "Yes, mam." Betty: "Well, I'm so thankful I've got the right person at last. Can you tell me some games to play for a children's party?"

The aggressive wife of a meek little man was hauling her husband over the coals for having made a fool of himself when some friends called. He sat in dejected silence. "And don't sit there," she shouted, "making fists at me in your pockets, either!"

Stan Frayn was suggesting the other day that a woman who is always up in herself and harping on something is not necessarily an angel.

Elaine Moss was "helping" her daddy at his workbench in the basement. Finally he tired of her incessant chatter and questions, and he asked her to be quiet for a little while.

"I don't have to be quiet," Elaine stated importantly. "I'm a woman."

Visitor: "What nice buttons you are sewing on your little boys suit. My husband once had some like that on his suit."

Vicar's Wife: "Yes, I get all my buttons out of the collection plate."

Wise readers advertise and sell unneeded articles through Standard Classified Ads.

Hy-Way Hank

"I have only one regret—I forgot to remind my wife to go to BALDWIN MOTORS for our Parts and Service."

Betty Harwood: "What are his intentions, Loretta?" Loretta Harwood: "Well, he's been keeping me pretty much in the dark."

A TIRED WOMAN'S EPITAPH Here lies a poor woman who always was tired.

For she lived in a house where help wasn't hired; Her last words on earth were: "Dear friends, I am going. Where washing ain't done, nor sweeping, nor sewing. And everything there will be just to my wishes."

For where they don't eat, there's no washing dishes; I'll be where loud anthems will always be ringing. But having no voice I'll get clear of the singing.

Don't mourn for me now, don't mourn for me never. For I'm going to do nothing for ever and ever."

FALL BLADE

IMMEDIATELY BEHIND THE COMBINE

Stop Spring Run-Off

Always use the sturdy straight blade attachment if penetration is found difficult with the shovel attachment shown above.

AN UNSOLICITED SATOR

BORDEN, SASKATCHEWAN,
April 2nd, 47.

Noble Cultivators,
NOBLEFORD, ALBERTA.

Gentlemen:

I covered every acre of my land last fall with the blade cultivator and am very well satisfied with the results so far. A lot of weeds were started, and I also notice this spring that the pot holes are not filled with water as they were other years and the way the neighbors' fields are.

Yours very truly,
(Signed) WALTER KARPAN.

In addition to conserving winter moisture, fall blade killing late ripening weeds before they seed. Mustard and stinkweed seed is blown much more than in unworked land, and can be killed with the first spring stroke.

Local News Items

A letter from the Canadian Cancer Society has been received by the chairman of the recent Cancer Society funds drive which was conducted locally, expressing the appreciation of the Society for the local donations, amounting to \$246.

Little Billy Tew underwent a tonsil operation last Saturday, and suffered a rather sore throat for a couple of days. Other children are undergoing the same operation before the opening of school.

Mr. and Mrs. Leslie Hand and children left Sunday for their home in Lodi, Minnesota.

Friday last Mrs. T. S. Hughes arranged a delightful bridge of three tables in honor of a number of visitors in Strathmore and vicinity, who include Mrs. L. Hand and Mrs. P. Sowden, who were guests of their mother, Mrs. Marcella, Mrs. Debon of Edmonton, visiting her sister, Mrs. J. G. Porteous, and Mrs. Druv of Winnipeg who is visiting her mother, Mrs. H. A. Ruppe.

Some very enjoyable games were played followed by delicious refreshments and a very interesting hour over the coffee cups.

Prize winners were Mrs. Hand, and Consolation Mrs. Ruppe.

At the recent Lions Picnic Jack Isard was enjoying the sport along with a number of other men when he hauled in a speckled trout which already had three hooks in its mouth and was pulling a 15 lb. line. This time the fish didn't get away. It weighed 3½ lbs.

Mrs. Tew was the proud possessor of a rich salmon colored gladiolus, that measured 5½ inches from tip to tip of the petal. It was a lovely flower. Mr. Henderson is now on the permanent staff of Ducks Unlimited.

Mr. and Mrs. Milligan had as guests the latter's sister, Miss Eleanor Mayhew and sister-in-law, Mrs. Anne Mayhew, over the weekend.

Miss Elva Robinson returned Saturday from a very happy holiday spent with relatives at Salt Lake City and surrounding points. Monday Elva left for Disabury where she will substitute in the Royal Bank for a few weeks.

Mrs. Harley Wilson spent the weekend with friends in Red Deer and Didsbury.

Art Moore, of CFCN transmitter, is spending a couple of weeks holiday in Calgary.

Miss Loretta Harwood joined the staff of the King Edward Grill just a week ago.

Jimmy Swanson is proudly exhibiting the lovely dahlia in his garden these days. It's certainly a beauty.

Mrs. Edna Hughes is spending a few days in Calgary visiting with her parents, Mr. and Mrs. H. Hilton.

Mr. and Mrs. Keith Baldwin and Enid returned Sunday evening from a holiday trip to Regina, Saskatchewan.

S. H. Crowther and Ronnie are spending a week in Brooks, holidaying with Max Walls and family.

Mr. and Mrs. Carl Egan, accompanied by Miss Anne Heathcote and Mr. B. Meadows, all of Calgary, dropped in on Mrs. Moore for a visit last Thursday, prior to leaving for Spokane on a holiday. Mrs. Moore is Mrs. Egan's grandmother.

Mr. Gordie Rott returned this week from Brooks where he has been employed for the summer.

Archie and Robbie Gray, of Lacomb, are both visiting their grandfather, Bob Gray, in Strathmore for a week.

George Chapell was taken to General Hospital in Calgary last Saturday by ambulance. His legs are very much swollen, but the nature of the trouble is not as yet certain.

COMING EVENTS

Regular Clinics for infant and Pre-School Children are held by the Wheatland Health District from 2:00 to 4:00 p.m.

Strathmore the second and fourth Tuesday in each month. Carlsland the second Friday in each month. Standard the third Thursday in each month. Rockford the third Friday in each month.

Don't miss the Aquatic Sports which will be held at the Lions Swimming Pool in Strathmore on Wednesday, August 27. Sponsored by Com. Council.

Entries for the Aquatic Sports must be turned in to Reg Smallwood, supervisor of the pool, by August 23. Age groups are 9-11; 14-17; and 17 and over. There will be added adult events. Don't miss the Aquatic Sports at the Swimming Pool on Wednesday, August 27. Sponsored by Com. Council.

Mrs. Givon Tew and Miss Helen Thurston are enjoying a few days in Calgary, guests of Mrs. Hare.

Misses Jean Tew, Doreen Isard and Evelyn Riddon are enjoying a week's visit with friends in Calgary.

Mrs. Ralph Ringstad and children are visiting at the parental home, returning to their home at the end of the week.

Schools will reopen in Strathmore Tuesday, September 2, at 9:00 a.m. Standard Time.

Mrs. Nellie Hansen was operated on for appendicitis in a Calgary Hospital on Tuesday. She is reported quite well.

Mr. Bill Riddon had the misfortune to lose the tip of the smallest finger on the left hand on Wednesday, when working with an arbor. The finger was not extremely painful on Wednesday reports, but he hates not being able to use it.

Mr. and Mrs. T. G. Anderson have their son, Bill, from Broadview, Saskatchewan with them, to make his home here.

Mr. and Mrs. John Melick, of Arcola, Saskatchewan, Mrs. Gertrude McKenney of Seamington, Ont., and Mrs. Lucille McKenney of Northville, Michigan, were all here to visit their brother, Mr. T. G. Anderson, and family recently. It has been more than twenty years since Mr. Anderson and Mrs. Gertrude McKenney have seen each other.

The shoe repair shop has a new man on the machines these days, and shoes are still being turned out.

Mr. and Mrs. Carl Jones of Donalds spent the past week visiting in Strathmore and Calgary.

Mr. and Mrs. Freddie Benz of Victoria are visiting friends in Strathmore at present.

Mr. and Mrs. Sid Goldwell, Jack and Dick arrived home Tuesday evening from a very enjoyable vacation in Saskatchewan.

WANTED

CARPENTER WORK—CEMENT WORK. Have my own mixer. No job too large or too small. Fred Taylor, 2a21c.

WANTED TO BUY—WASHING MACHINES, gas or electric, Donovan Industries, Phone 48, Strathmore. Get your washer repaired. It needs it. How about your radio? Donovan Industries. Phone 48, Strathmore.

LOST

LOST OR STRAYED LAST THURSDAY 1 polled Hereford cow from my farm 5½ miles south of Strathmore, branded as cut on left hip. Phone 1019 or 1719, Van Wezel's. 1a21p.

MISCELLANEOUS

CALLING ALL EX-SERVICE MEN. Take notice that opportunities for Vocational or Trade Training under the Department of Veterans Affairs will be discontinued after December 31, 1947.

(Inserted by The Strathmore Branch No. 10 of the Canadian Legion of the B.R.S.L.) 2a28c.

AN APOLOGY
Don Robertson and his Entertainers were hired on the basis of past performances. The personnel of his troupe are not what they were nine months ago. We were not aware of this fact. We were hoping to bring an outstanding entertainment feature to the public and are as disappointed as most of those who attended their mediocre performance.

Strathmore Branch No. 10 Canadian Legion Executive & Entertainment Committee.

ROOM & BOARD FOR HIGH SCHOOL GIRLS. Apply B. Wyman at Klüber's Ranch. 1a21p.

NOTICE

A discount of three percent will be allowed on Town of Strathmore current Tax paid on or before the 31st October next.

M. B. Garrett Secretary Treasurer. 2a28c.

Fall Is Coming!

WE KNOW YOU DON'T WANT TO BE HELD UP IN YOUR HARVEST... SO

TUNE UP YOUR ENGINE

and keep it tuned up... for

- FUEL SAVINGS
- EFFICIENT OPERATION
- SMOOTH POWER
- LONGER ENGINE LIFE
- QUIET RUNNING
- SPARKLING PERFORMANCE

There's no other service operation that pays so great a dividend at so small a cost. In fact, a tune-up often pays for itself in fuel and oil savings.

HUSSAR NOTES

At 3:30 and a dance in the evening; good music assisted. The Hussar will start at 3:00 P.M. sharp. There will be several unique features as the sale of "White Elephants", a cash pond, and many lovely articles for sale for Christmas gifts, and the home cooking counter.

All donations for the shipment of canned fruit and vegetables for the Junior Red Cross Hospital, are to be in by that date, so please bring them in as soon as you can, and by November 7, at the very latest; Mrs. T. Burdett, Convenor of the committee. The September meeting, on the 11 will be at the home of Mrs. Karl Knudsen.

A silver cup was given with the best wishes of the Aid, to baby Norman Dale Burrows.

The program was greatly enjoyed, a reading by Mrs. T. Burdett, and a piano solo and encore by Miss Ruth Treacy. The interesting contest was won by Mrs. R. B. Snyder, with a perfect score.

A very delicious lunch was served by the hostess, Mrs. W. A. Treacy, assisted by Mrs. I. Treacy, and sincere thanks was extended to them for a lovely meeting, and enjoyable social afternoon. It is hoped that all members will be present at the September meeting.
